

# DANIEL CUETO

## Full-stack Web Developer

Web developer with **over 5 years of experience**. Specializing in **frontend** development with a strong understanding of UX/UI design best practices.

My curiosity and initiative led me to a **self-taught** passion for programming, providing me with great **adaptability** to new technologies. The training acquired through bootcamps has given me a robust foundation to tackle technical challenges and highlight my skills in **analysis and problem-solving**.

Methodical and focused on developing **refined products** through **testing**, with a great emphasis on **detail**. My previous experience in **iOS application development** provided me with a comprehensive view of software architecture.

I enjoy making **team** decisions and **taking risks** if the situation requires it to find better solutions. I am an **empathetic** person who likes to connect with people. I enjoy working on projects that can positively contribute to people. All this allows me to translate user needs into software.

### EDUCATION
